

PLUSH DYNAMIC LUBE

HIGH PERFORMANCE BICYCLE SUSPENSION LUBE

DESCRIPTION:

Maxima Plush Dynamic is an advanced specialty lube formulated for high performance suspension systems. Formulated and tested with OEM engineers and designed for use in lower fork legs and multiple other non-damper components. Surface active technology reduces static and dynamic friction and considerably lowers the force needed for easy breakaway, providing smooth action throughout the entire range of travel.

Contains special seal conditioners for extended seal life. Ultra-clean detergents keep the system clean and offer long-life, trouble-free operation.

FEATURES & BENEFITS:

- High performance lube for lower fork legs
- Dynamic lube activates on loaded bushings and seals
- Reduces static (stiction) and dynamic (running) friction
- Proprietary additive system minimizes wear and keeps the system clean
- Long-life fluid extends time between rebuilds

APPLICATIONS:

For all lower fork legs and other non-damper suspension components, including All Mountain, XC, Gravel, Downhill, Enduro and Freeride. Also approved for use in some dropper post seat designs.

NOTE: Plush Dynamic Light is a direct replacement for all Rock Shox forks specifying the use of 0W-30.

TECHNICAL DATA

SPECIFICATION	TEST METHOD	LIGHT	HEAVY
APPEARANCE	VISUAL	Amber	Red
VISCOSITY @ 40°C (cSt)	D445	49.2	115.0
VISCOSITY @ 100°C (cSt)	D445	8.5	17.2
VISCOSITY INDEX	D2270	161	164
FLASH POINT (°C)	D92	365	490
POUR POINT (°C)	D97	-38	-36
DENSITY @ 15 °C (g/ml)	D4052	0.842	0.846
